

About You

b1) Why are you entering this competition?

- I have an idea about a VPS provider on the cloud.

b2) What experience do you have in the industry?

- 3 years of experience, started out with a hosting company the moved to a VPS provider (redacted) and then owning a full domain registrar and hosting company.

b3) If you have worked previously for other providers please list them?

- N/A

b4) Have you ever worked for or been associated with a deadpool provider?

- No

About Your Vision

c1) What is your vision for your provider?

- Low end Cloud system based on SolusVM

c2) What specifically will make your provider unique to existing providers?

- The cloud and low cost VPS with low cost resources to be purchased.

c3) What qualities/skills do you possess that are advantageous to your vision?

- I am a skilled programmer :) also i have knowledge on unix systems, shells, and stuff like that :D, i think 2-3 years of experience on my back will be beneficial for the company (if i win).

c4) What qualities/skills do you believe are required for the long-term viability and sustainability of your vision?

- Just a strong will, patient, and great carisma.

c5) If you have these great ideas why aren't you executing these ideas now? Why is your vision not already

a provider?

- Well always a startup is like a win-lose, you may be successfully but at the same time you can lose everything, i am a bit coward to invest above 2000\$ for something i am not sure it will give its result.

Building Your Vision

d1) What is your target market?

- Cheap low end VPS, Cloud clients :), Developers, small business

d2) How will you connect with this market?

- Lowendbox, Forums, mouth to mouth advertising, blog posts, competitions, and sponsorizations.

d3) Are you confident that this market can sustain you?

- Yes i am sure that it will, there are plenty of Datacenters who provide low end and high specs dedicated servers.

d4) Are you willing to make financial self-investment to build your vision?

- Yes i am, if i have the right kick on my but , i can start to walk :) or even run if i need to.

Your Capabilities To Serve Your Vision?

e1) What is your level of technical experience?

- I have a good understanding of servers, unix, good programming skills which i believe will be required to make specific and unique changes to how the system will work.

e2) What is your level of problem-solving capabilities?

- In what context? :)

e3) How much time can you assign to make your vision of a provider become a reality?

- within 1 month i can launch the Startup
-

e4) How much time can you assign over the long-term to ensure it's viability and sustainability in to the future?

-Fully dedicated to it, since my other company, does not require to much attention.

Plans and Projections

f1) What virtualisation technology will you be working with?

- Xen or KVM, with SolusVM

f2) How many plans would you start with?

- It will be a No Plan Basis, or better say, buy resources :), if you need 1 gb HDD and 5GB RAM you get what you ask for :).

f3) Please list those plans in detail (CPU,RAM,HDD..etc) and assign a dollar value in USD or converted to USD.

- Maybe we will also feature specific plans for lowend.

f4) What is your 3 month milestone?

- building the system, within 1 month, and at the same time, calculating the requirements of my market, launching the startup.

f5) What is your 6 month milestone?

- Advertisement, addapting and providing sponsorizations so the word can get out there about the company.

f6) What is your 1 year milestone?

- focusing on the upgrading the infrastructure and marketing

f7) What is your 2 year milestone?

- N/A

Margins & Profits

After the 6 months has passed your lease on the server will be \$150/Month, an additional \$16/Month for WHMCS and then an approximate of \$10/Month depending on your Virtualisation Panel choice. Lets give you a buffer and

associate your total monthly cost for the operation at \$180.

g1) What profit margin are you aiming for in percentage?

- 20% - 40% Profit margin

g2) How many customers do you assume you can fit on your server?

- With the specific server = 50-60 Clients.

g3) What is the minimum amount you expect to extract from your server per month excluding costs?

- 100\$-200\$

g4) What is the minimum amount you expect to extract from your server per month including costs?

- 200\$ - 300\$

g5) What is the maximum amount you expect to extract from your server per month excluding costs?

- 200\$ - 400\$

g6) What is the maximum amount you expect to extract from your server per month including costs?

- 400\$ - 600\$

Thank you
